 5. Enters the new information about the employee (with exception to the Emp. Id) 6. Submits the information 7. Checks the validity of the information 8. Registers the edits the information a employee 			
employee (with exception to the Emp. Id) 6. Submits the information 7. Checks the validity of the information 8. Registers the edits the information a employee			
 6. Submits the information 7. Checks the validity of the information 8. Registers the edits the information a employee 			
7. Checks the validity of the information 8. Registers the edits the information a employee			
8. Registers the edits the information a employee			
employee			
9. Returns the Employee View Scene	bout the		
III. Delete an employee			
1. Selects the View Employees Scene			
2. Changes scene to the Employee View	1		
3. Selects the delete option			
4. Prompts a reassuring message			
5. Confirms to delete the information about the employee			
6. Deletes the employee from the syste	m		
7. Returns to View Employees Scene			
Alternative Flow A. (Base Flow I.5.) An employee with the same Employee Id exits;			
(AF)1. System prompts the manager with an error message;			
System returns to Register Employee Scene -> Base Flow I.3.			
facility the text should be big enough so it can be seen from at least 1m distance; In case	After each task performed the system updates the changes; In cases of the terminals used in the facility the text should be big enough so it can be seen from at least 1m distance; In cases of the terminals used in the facility the terminal so be positioned at the main worker entrances of the facility as well as installed at a comfortable height to be used when standing.		

Manage Time Stamps Use Case

		The Change		
Use Case	Manage Time Stamps			
Summary	A manager is able to edit/delete a Time Stamp			
Actor	Manager			
Precondition		3. The manager must be registered in the sys		
		4. The manager must be logged in to perform the task		
Base Flow		Actor	System	
(BF)	I.	Editing a	Time Stamp	
	1.	Manager Request all the Time Stamps		
	2.		Retrieve Registration Use Case Base Flow	
	3.		Change View to Time Stamps	
	4.	Select the Time Stamp to be edited		
	5.	Selects the edit option		
	6.	Enters the new information about the Time		
		Stamp (with exception to the Emp. Id)		
	7.	Submits the information		
	8.		Checks the validity of the information	
	9.		System registers the information about the	
			Time Stamp	
	10.		Returns the Time Stamps View Scene	
	II.	I. Delete a Time Stamp		
	1.	Manager Request all the Time Stamps		
	2.		Retrieve Registration Use Case Base Flow	
	3.		Changes scene to the View Registration	
	4.	Selects the delete option		
	5.		Prompts a reassuring message	
	6.	Confirms to delete the information about		
		the Time Stamp		
	7.		Deletes the Time Stamp from the system	
	8.		Returns to View Time Stamp scene	
Alternative Flow				
(AF)				
Note	After each task performed the system updates the changes; In cases of the terminals used in the			
	facility the text should be big enough so it can be seen from at least 1m distance; In cases of the			
	terminals used in the facility the terminal so be positioned at the main worker entrances of the			
	facility as well as installed at a comfortable height to be used when standing.			

Retrieve Registration Use Case

Use Case	Retrieve Registration			
Summary	A manager is able to retrieve all the registrations / An employee is able to retrieve personal registrations			
Actor	Employee			
Precondition	 The manager must be registered in the system in order to go on break; The manager must be logged in to perform the task The Employee must be logged in 			
Base Flow		Actor	System	
(BF)	I.	Manager Retrieve Registrations		
	1.	Selects registrations to be retrieved (Employees/Time Stamps)		
	2.		Asks the format of the for the file to be downloaded	
	3.	Select the specific format (PDF)		
	4.	Selects the edit option	Downloads the requested registrations	
	II.	Employee Retrieve Registrations		
	1.	Selects the registrations to be retrieved		
	2.		Asks the format of the for the file to be downloaded	
	3.	Select the specific format (PDF)		
	4.		Sends registrations to the email	
Alternative Flow (AF)				
Note	After each task performed the system updates the changes; In cases of the terminals used in the facility the text should be big enough so it can be seen from at least 1m distance; In cases of the terminals used in the facility the terminal so be positioned at the main worker entrances of the facility as well as installed at a comfortable height to be used when standing.
