!Note: Any use of personal information in the examples are non-harmful and only used with

the intention of presenting the features of the system. But in case of being offending or

harmful please contact us at any time.

Access to the software

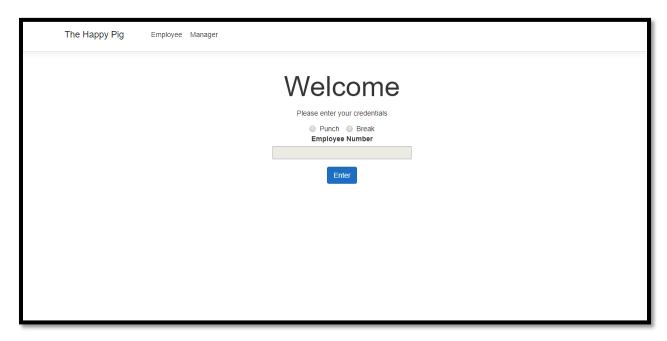

Access to the software is made through web, which means it can be access from any device with capabilities of connecting to the internet. The page can be accessed at

www.el-aasi.com

Punch/Break in/out

To perform a punch/break in/out – or work/break time registration – an account number will be needed, and in this example the account number 1111 will be used. After accessing the web page on www.el-aasi.com the user will be presented with the next view.

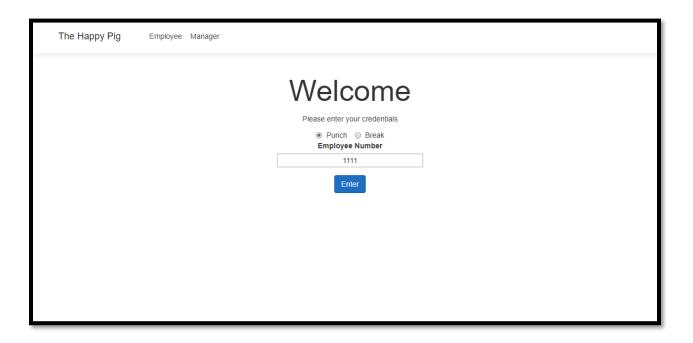

Figure 1 - Welcome Page

After being presented with the page above the user will select *Punch* (for work registration and *Break* for break registration).

And will input the account number. It should look similar to the Figure 2.

Figure 2 - Welcome Page - Ready for submit

After submitting by pressing the *Enter* keyboard, or *Enter* blue button, an informative message will be displayed about the registration. There are 4 possible positive messages depending on the situation as presented in the *Figure 3*.

Figure 3 - Positive Messages

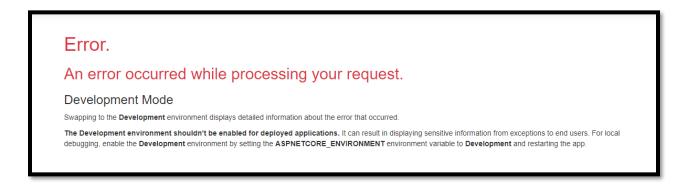

Sometimes, base on the situation other messages can be displayed, particularly when something went wrong:

- Punching out while on break;
- To Break while punched out;

Figure 4 - Negative Messages

!Note: If after entering the credentials and submitting them to register a time the next page is displayed, please refresh and try again.

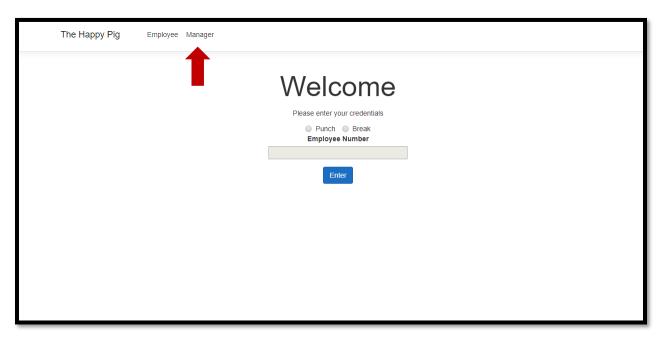

Manager

Login in

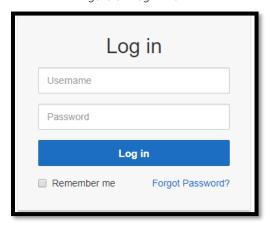

To log in a Manager needs to access the welcome page at www.el-aasi.com and then select the Manager tab from the navigation bar.
